STATE-OF-THE-ART DEBLISTERING SOLUTION FOR THE PHARMACEUTICAL INDUSTRY WITH UNRIVALLED RECOVERY RATES, FLEXIBILITY AND SPEED.

MACHINE OPERATION

The speed of the machine operation can be varied to a maximum of 60 blisters per minute.

1. Blister packs are fed automatically from the magazine stack through a set of rollers.
2. The tablets or capsules are gently eased out of the blister and are collected separately from the waste packaging.
3. A status panel on the user interface allows operators to quickly and easily identify the location of any faults during machine operation.

TOOLING

Custom tooling is required for each different blister pack size. Format changeover, which does not require tools, is fast and easy.
